

Product Advice: Midwinter's *Super* ⇌ *Pension* module

Midwinter's *Super* ⇌ *Pension* module guides financial advisers in justifying providing a potential reasonable when transferring a client from superannuation (accumulation phase) to an account based pension (drawdown phase).

Drawing from Midwinter's extensive database of superannuation and pension fees and features (over 600 super and 150 pension platforms currently available) – *Super* ⇌ *Pension* allows financial advisers to thoroughly investigate the existing superannuation and potential pension products, and determine whether there would be a reasonable basis to transfer.

It provides the most true-to-life picture of the client's superannuation and potential pension positions possible by incorporating all known factors and variables.

Super ⇌ *Pension* allows advisers to highlight the impact of implementing strategy in the pension including:

- Drawing a dollar amount from of an account based (can be indexed),
- Drawing a fixed percentage from an account based pension,
- Drawing a certain amount from an account based pension to ensure it finishes at a certain age,
- Drawing the minimum amount possible from an account based pension.

Leveraging off Midwinter's database of super and pension products, *Super* ⇌ *Pension* quickly produces:

- All exit fees incurred in superannuation phase,
- Detailed projections of all fees incurred in pension phase (including entry, withdrawal, MER, administration, review, trustee and miscellaneous fees. Portfolio rebates and buy/sell spreads are also calculated),
- Product replacement statements,
- Account based pension specific asset allocations vs. Client risk profile (with model portfolio functionality),
- Tax free components with dual pension functionality – ideal for estate planning purposes,
- Linking of client objectives with rollover relevant features,
- Automatic comparison of relevant features,
- Dynamic Words,
- Practice Management value proposition,
- Dealer specific templates,
- Easy to generate custom tables for the detailed orientated financial adviser,
- Statement of advice generation functionality – includes commission & fee for service reporting.

The Midwinter Fee Index (MFI)

Pension ⇌ *Super* examines the concept of overall cost savings on your client's total overall portfolio.

This can be represented by the Midwinter Fee Index – a single effective index which simply shows the average annual average fee paid by the client over the life of the account based pension.

By calculating an average annual cost across all platforms, the Midwinter Fee Index makes it easy to digest complex fee structures. This makes decisions for the adviser and client very simple.
